Over the past two decades, China's political reforms, open door policy, dramatic economic growth, and increasingly assertive foreign policy have had an unprecedented regional and global impact. This introductory textbook provides students with a fundamental understanding of government and politics in China, as well as the conceptual ability to explore the general patterns, impacts, and nature of continuities and changes in Chinese politics. Further, it equips students with analytical frameworks by which they can understand, analyze, and evaluate the major issues in Chinese politics, including the basic methodologies and theoretical controversies in the study of Chinese politics, the major dimensions, structures, processes, functions, and characteristics of the Chinese political system, such as ideology, politics, law, society, economy, and foreign policy; the impact of power, ideology, and organization on different spheres of Chinese society; the structure, process, and factors in Chinese foreign policy making; whether China is a strategic partner or potential threat to the United States; by examining contending theoretical models in the study of Chinese politics, this book combines an essentialist approach that keeps focus on the fundamental, unique, and defining features of Chinese politics and government with other theoretical approaches or analytical models which reveal and explore the complexities inherent in the Chinese political system. Extensively illustrated, the textbook includes maps, photographs, and diagrams, as well as providing questions for class discussions and suggestions for further reading. Written by an experienced academic with working knowledge of the Chinese government, this textbook will provide students with a comprehensive introduction to all aspects of Chinese politics.

This book examines the new equity-enhancing politics in China in the context of Chinese traditional cognitive patterns of political legitimacy and its implication for Chinese political development in the near future. Based on an analysis of the new governing philosophy, the generation of political elite, and a new set of public policies, the book reaffirms the emergence of a new Chinese polity that infuses one-party rule with limited electoral and deliberative democracies. Unlike many scholars who perceive the contemporary Chinese history as a constant search for democracy, this book takes a very different approach. It asserts that the enduring question in political development in China today is no different from what was sought after throughout Chinese history: namely, the constant search for political legitimacy. Even though the

quest for democracy is instrumental to that end it may not ultimately lead to the embrace of a full fledged liberal democracy the new politics is not only a rationalization of the efficiency based development but also a major paradigm shift in china s developmental strategy
